

HUGUARD Reusable Respirator Gas and Combined Filters

High Efficiency Particulate Protection

- Advanced glass fiber material delivers high efficiency against both oily and non-oily particulates
- Hidden grid air inlet prevents dust and liquid splash

Durable Materials

- Stability for diverse operating conditions
- Ultrasonic welding process makes the box body more solid and the activated carbon filling more compact

Easy Breathing Gas/Vapor Cartridges

- Ensures smoother airflow with reduced resistance
- Maximizes activated carbon utilization for extended protection time

High Quality Activated Carbon

- Coconut shell activated carbon, long protection time and low ash content
- Chemical impregnation treatment, superior adsorption of various gases

Swept-Back Design

- Swept-back design allows an enhanced field of view and comfort
- Rotary bayonet system for connection to a wide range of HUGUARD half and full masks
- Easy and quick assembling

CE

9001P3 Organic Vapor P3 Combined Filter

CERTIFICATION EN14387:2004+A1:2008 A2P3 R

SPECIFICATION 2 pcs/bag, 40 pcs/ctn

DETAIL

Protection object: organic vapor, such as benzene and homologues, gasoline, acetone, carbon disulfide, ether, etc. Combined with a P3 filter against particulate.

CE

8003P3 Organic Vapor / Acid Gas P3 Combined Filter

CERTIFICATION EN14387:2004+A1:2008 A1E1P3 R

SPECIFICATION 2 pcs/bag, 40 pcs/ctn

DETAIL

Protection object: organic gas or vapor, sulfur dioxide and other acid gas or vapor. Combined with a P3 filter against particulate.

CE

8006P3 Multi Gas / Vapor P3 Combined Filter

CERTIFICATION EN14387:2004+A1:2008 A1B1E1K1P3 R

SPECIFICATION 2 pcs/bag, 40 pcs/ctn

DETAIL

Protection objects: benzene, homologues and other organic vapors, sulfur dioxide and other acidic gases, ammonia, methylamine, formaldehyde, hydrofluoric acid, hydrogen cyanide, etc. Combined with a P3 filter against particulate.
